

Remove Fumes at Their Source!

**New
Portable
Model!**

Shown in a welding application with a custom hood and support arm, the portable Place-A-Vent wheels up to the in-plant operation to remove fumes, heat and odors at their source.

Keep Your Environment Clean, Safe and Comfortable.

Removing and ventilating fumes produced by welding, brazing, soldering, plasma or laser cutting, and similar operations is a critical concern in today's safety-conscious work environment. The Place-A-Vent portable fume extractor is an economical and convenient way to remove smoke, fumes and heat at their source to help assure worker safety and comfort.

**1 Year
Warranty!**

Mounted on a rugged, easy-to-manuever cart, the portable Place-A-Vent is simply wheeled up to the location where the fumes are being produced and need to be removed.

The operator plugs in the unit to a standard electrical supply, directs the discharge hose to the desired exhaust outlet, and adjusts the collection hood to the fume area. When finished, the hoses are rolled back onto the cart for fast, easy clean-up and storage.

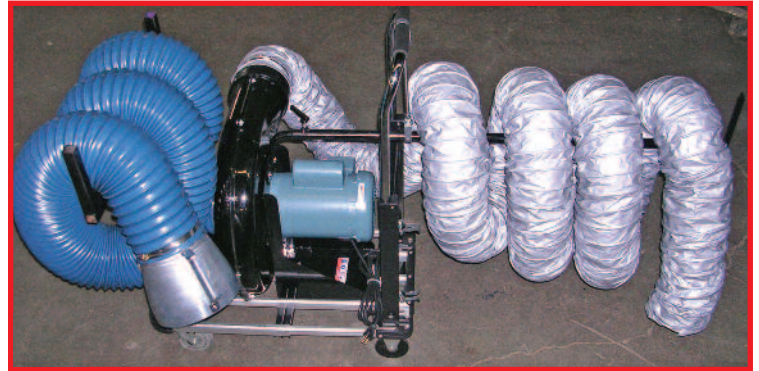

Place-A-Vent™

Portable Place-A-Vent Specifications & Pricing

System Components:

- High-pressure fan unit fabricated with 14-gauge steel housing and a self-cleaning, cast aluminum radial wheel
