

Remove Fumes at Their Source!

Starting at
only
\$374!

Keep Your
Environment
Clean, Safe and
Comfortable.

Place-A-Vent Model FE-800 has a large-diameter hood, making it ideal for welding and brazing applications.

Removing and ventilating fumes produced by welding, brazing, soldering, laser cutting, plasma cutting, and similar operations is a critical concern in today's safety-conscious work environment.

Place-A-Vent is an economical, energy-efficient fume extractor that removes smoke, fumes and heat at their source to help assure worker safety and comfort.

Unlike exhaust fans or fixed overhead hoods, Place-A-Vent goes right to the source to capture and remove virtually all process emissions. It employs a negative pressure system that exhausts all fumes quickly to the outside or into existing ductwork. Place-A-Vent is the newest system from the manufacturer of Vent-A-Fume industrial fume extractors, and Vent-A-Kiln, the leading venting system used in schools and ceramic

studios. We have more than 20 years experience as specialists in removing contaminated air and process emissions at their source. Let us put Place-A-Vent to work for you.

Place-A-Vent System Features:

- Easy to install - all mounting components included
- Can be easily moved to a different location - an advantage over exhaust fans and fixed overhead hoods
- Can be modified for multiple work stations
- Larger volume fans and hazardous-duty motors available
- Two styles of hood support arms available
- One-year warranty

With a customized hood attached to the traveling head, Place-A-Vent provides on-the-spot fume extraction for laser cutting or plasma cutting.

Soldering is safer and easier with Place-A-Vent Model FE-500 removing smoke and fumes from the work area.

* Model FE-500 includes a 6-inch, three-prong power cord; Models FE-800, FE-1000 and FE-1200 need to be hard-wired or have a power cord added.

** Longer lengths of Flex Hose available at \$6.25 per ft.

All Place-A-Vent models include:

- 1) Collection Hood
- 2) Hood Support (table top)
- 3) Blower
- 4) Flexible Hose
- 5) Gravity Closed Louver
- 6) Blower Support Bracket
- 7) Tail Pipe
- 8) Clamps

Customized systems available.

Accessories:

Flexible Gooseneck Hood Support Arms

Gooseneck Arm with Clamp Base secures the support arm to surfaces up to 2-inches thick. Polyurethane pads on the clamp prevent marring of mounting surfaces.

Gooseneck Arm with Magnetic Base provides 100-lbs. of pull strength for extra holding power. It can be placed on any magnetic surface.

Model	Description	Length (in.)	Price
FECB15	Gooseneck with Arm Clamp	15.0	\$93.00
FECB23	Gooseneck with Arm Clamp	23.0	\$99.00
FEMB15	Gooseneck with Magnetic Base	15.0	\$91.00
FEMB23	Gooseneck with Magnetic Base	23.0	\$97.00
