

Fume Extractor for Encaustic Painting Studios

"Efficient, quiet, and easy to install, Vent-A-Fume Encaustic Fume Extractor creates a safe working environment for any encaustic artist."

-Mark Lavatelli, MFA, Professor of Humanities, Medaille College

Model ENC2015 Encaustic Fume Extractor

Removing and ventilating fumes is a critical concern in today's safety-conscious work environment.

Vent-A-Fume™ model ENC2015 Fume Extractor is a complete new ventilation system designed specifically with the encaustic painter in mind. Using the "close-capture" principle, it provides quick and efficient removal of undesirable and/or unpleasant fumes typically associated with encaustic painting.

Vent-A-Fume™ utilizes a positive pressure system that exhausts directly to the outside or into your existing ventilation duct work. This palette venting

system is easy to assemble for use on workbenches and tabletops in your encaustic painting studio. Its ergonomic, lightweight design makes the portable unit easy to transport and reposition as needed.

Vent-A-Fume™ table-mounted fume extractors help provide healthier conditions for encaustic artist studios as well as other similar fume-producing processes such as oil painting, sculpting, or print making applications.

1 Year Warranty
